

OUR CAPABILITY

# MINING & BULK SOLIDS MATERIAL HANDLING

# MARKET LEADERS IN ENGINEERING PLASTIC SOLUTIONS

Dotmar stands as the largest distributor of semi-finished engineering thermoplastics across ANZ. With over 50 years of experience, we pride ourselves on being your foremost ally in conquering the most challenging mining applications

Well established in the mining industry and leading its industry in plastics, Dotmar has built its reputation by delivering a high level of customer service, a deep understanding of applications and material selection technical support.

Dotmar complies with the requirements of ISO 9001:2015 for the following scope: The manufacture, sale, and distribution of semi-finished and finished engineering thermoplastic components including conveyor products.

FRAS – Fire Retardant & Anti-Static

Complies with the requirements of

MDG3608

For underground coal mines

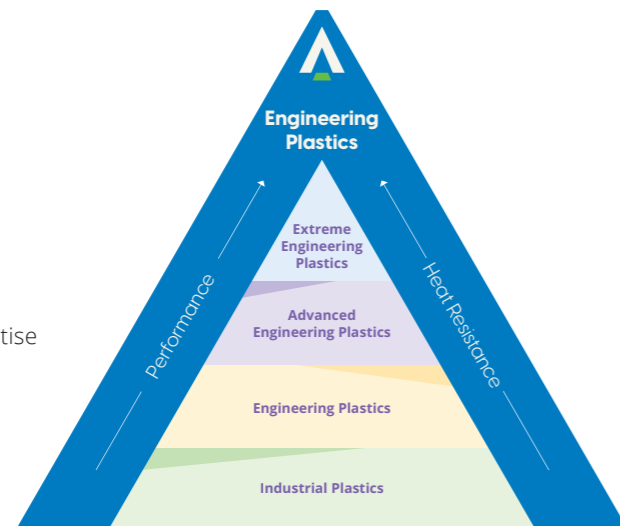

## OUR CAPABILITIES

### Application Development

Unsurpassed technical expertise helps mitigate risk during specification. From design to prototyping, partner with Dotmar to help materialise your idea.

### Custom Manufacturing and Engineering

With total machining capabilities in all locations, Dotmar can produce finished parts from even the most challenging engineering plastics.

### Largest Selection of Engineering Plastics

Representing the most reputable, semi-finished thermoplastic and conveyor part manufacturers, Dotmar stocks an unparalleled range of materials across Australia and New Zealand.

## FEATURED APPLICATIONS

### FLOW PROMOTION LINING

Polystone Matrox liners help eliminate hang-up for bulk solids in chutes, hoppers and mobile plant.

Dotmar provide the full system, including specialised fastening systems, as well as full installation.

### SHOVEL & DRAGLINE COMPONENTS

Wire rope sheaves and wear blocks, that reduce weight and improve wear life, reducing downtime. Designed to meet client and crane standards.

### CHEMICAL PROCESSING

- Filter plates
- Precipitation screens
- PTFE lined pipe
- PTFE bellows

### CONVEYOR SKIRTS

Manufactured from both traditional materials such as Polystone (UHMWPE) and polyurethane, but also from Ticomp HVM for higher speed (6 m/s) conveyors.

### SAFETY GUARDS

Light weight safety yellow Polystone 300 machine guarding

- Easy installation
- No painting, corrosion, or maintenance
- Noise suppressing

### WEAR PARTS

Reclaimer wear pads replacing bronze & articulated vehicle bush

- Increase service life
- Lower friction
- No lubrication required
- Reduced counter-face wear

### CUSTOM FABRICATED PLASTIC TANKS

- Chemical Resistance
- No painting, corrosion, or maintenance
- Lightweight
- Designed to DVS standard
