

Continental 
The Future in Motion

The future of crimping at your fingertips.

The new Continental crimper controller is a 21st-century improvement over manual crimping. Precise digital crimping and cloud solutions: a quantum leap in the world of hydraulic and industrial hose. *Discover the next generation of crimper controllers.*

Access.

Elevated.

Easy-to-use, 10" high-resolution touchscreen interface gives you access to crimp specs, notes and tutorials at the touch of a button.

Wire.

Less.

Bluetooth 4.0 capability supports wireless calipers and accessories, with 8GB of on-device memory for crimp specs and other applications.

Tech.

Support.

Create support tickets directly from the crimper with screen capture capability and machine status for more responsive help when you need it most.

Process.

Perfected.

With full MyCrimp™ crimp specification app integration, you can easily import and store up-to-date crimp specifications with no manual entry required.

Connection.

Established.

Fully connected via Wi-Fi or Ethernet to CrimpCloud™ to keep your die preferences, users and settings information secure and accessible 24/7.

Safety.

Solutions.

Track machine performance and maintenance schedules, and identify good and bad crimps for superior quality.

Crimping.

Evolved.

Introducing a perpetually evolving technology that allows you to grow and add endless features and solutions.

A Quantum Leap in Crimping.

Continental 

The new crimper controller from Continental is a huge leap forward. No more hunting through manuals to find the right specs. To crimp a fitting onto a hose, simply use our touchscreen interface. Save presets, access tech support and back up your data to the cloud with the touch of a button.

The Future of Crimping Is Here.

ContiTech.

The ContiTech division of the Continental Corporation is one of the world's leading industry specialists. As a technology partner, our name is synonymous with expertise in development and materials for components made of natural rubber and plastics and also in combination with other materials such as metal, fabrics or silicone. By integrating electronic components, we are also generating solutions for the future.

Beyond products, systems and services, we also provide holistic solutions and have a formative influence on the industrial infrastructure. We see digitalization and current trends as an opportunity to work with our customers to add sustainable value - for both sides and for good.
