

Beaver's materials handling range includes chain and lever blocks from 250kg to 20t working load limit (WLL). Using the right equipment to safely lift and move equipment can save time, money, and most importantly, lives. Knowing how to use this equipment, while having peace of mind that it meets all required standards, and is easy for workers to identify and handle, is even more important.

Beaver 250kg and 500kg Lever Blocks are designed for small to medium size lifting and pulling applications. The design combines strength and compact design into one, to provide a high quality and versatile lever block.

Beaver 3S 500kg, 1T, 2T, 3T, 5T and 10T Chain Blocks are heavy duty industrial blocks designed for heavy lifting and a variety of applications in mining, heavy industrial, major construction works and off shore exploration.
