

RECOVER WATER DAMAGED ITEMS WITH **CORROSIONX**®

Recover water damaged items by spraying CorrosionX on them now and drive out the moisture permanently - it will stop electrolysis and rust on impact.

CorrosionX can be sprayed over wet, drowned, even still live, corroding contacts, wires, solenoids, engines, fuse boxes and transformers. It can be used for up to 39,000 volts, including on still live circuits. It will penetrate through oxidation to bond with the clean metal underneath, displacing any existing corrosion and surface debris, right down to the molecular level.

- Non flammable
- Applicable over wet and corroded PCB's/electrics/electronics
- Oxidation-fighting, stops and prevents electrolysis
- Neutral on all insulation, plastics, rubber and neoprene
