

AGRO POWER BELTS

OPTIBELT has been manufacturing drive belts in the most diverse and demanding designs since 1948 – based on over one hundred years of experience in rubber processing the AGRO POWER series belts are constructed to original equipment quality are suitable for the demands of agricultural machinery.

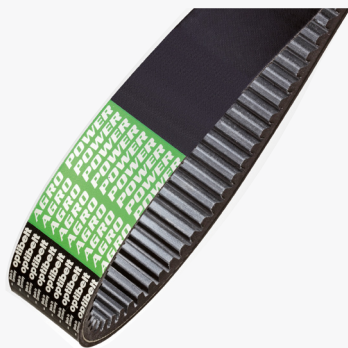

AGRO POWER belts can be cross referenced directly from the original equipment numbers of many prominent manufactures.

AGRO POWER V-BELT AND KRAFTBANDS

Optibelt AGRO POWER V-belt and Kraftbands have the following features:

- Abrasion resistant cover fabric
- High-quality rubber compound
- Special low-stretch tension cord allows for high dynamic loads

These outstanding qualities, such as high performance level and reliability, come to full effect in the high loaded drives of agricultural machinery.

AGRO POWER VARIABLE SPEED BELTS

Optibelt AGRO POWER variable speed belts are used to continuously adjust speed and have special belt design feature:

- Accommodate high dynamic loads
- Excellent power transmission and control characteristics
- High - quality fiber- reinforced rubber compounds
- Low-stretch tension cords

PULLEYS

BENEFITS

Made from EN-GJL 200 – DIN EN 1561
and are balanced in one plane (statically)
to quality level Q16 as in VDI 2060.
